David Redmond

Front End Engineer

💼 Employment History

Front end Developer at IFX Payments UK

2018 – Present

Working this FinTech company I have been mostly working on our 2 client facing sites. Our website build in Nuxt.js using Vue and Vuex frameworks and our backing product ibanq.com with is build in a mixture of Angularjs and new modules in React. I have also been using other stacks such as PHP / Twig and email templating.

Freelance web developer

2012 – Present

I have been building website initially in WordPress and later in the javascript MEAN stack, also using javascript templating frameworks such as handlebars. I began using Django (Python) whena client requested it. Mostly this work was for small businesses worldwide and several agencies.

R&D UX / UI Developer at Samsung R&D

2016 – 2018

Collecting user feedback, researching software solutions based on the feedback received. Monitoring market changes and updating the code and error fix.

Application Tester at Lionbridge Technologies

2010 – 2013

My duties included software testing and performing manual and automated QA testing for Microsoft, while working in this multilingual & multicultural environment, I became acutely aware of the need for simple easy to use interfaces.

🎓 Education

Computer Science, University of the People

2017

📊 Skill Set Outline

JavaScript

I am very experienced with using Javascript in both back and front end projects. I started using it in handlebars and ejs but mostly on static and SPA client-side apps (React, Vue & some Angular) for 2 years. I am very familiar with es6 features and syntax.

Node & APIs

I have build small servers for personal, freelance projects and to assist in front end development, using node and express. I have implemented RESTful stategies, this gave me a good understanding of Http requests and packages to help with this.
